We come together to walk in witness to the suffering of our earth and her people.

We come together to walk in witness to the suffering of our earth and her people

- with hope for compassion and healing
- as a reminder about the climate and ecological crisis
- Asking the government to fund nature-friendly farming
- To make polluters pay for their environmental damage
- Make more space for nature
- Access to clean air, water and nature for all communities
- Halve emissions by 2030

We offer a safe and contemplative activity to hold our frustration, fear and grief, hope and love; and, as we pause, to model a new way of being in relationship with each other and the earth
